Algebra is essential knowledge for a high school student trying to meet Common Core Standards. Algebra is a branch of mathematics that uses letters and other symbols in equations to represent unknown values and then uses what is known to figure out what

is unknown. For example, if $5x = 40$ (that is, 5 multiplied by x equals 40), you know that $x = 8$ because given what we've been told — the known information — 5 is the only number that makes the number sentence true ($5 \times 8 = 40$).

mathematical relationships in the world. They also learn to state patterns and structure that appear in their arithmetic, and to notice and state new relationships. In seventh grade, most of these relationships are proportional, which means that there is a constant rate of change in one variable relative to another.
