The word is Greek and means "imitation" (though in the sense of "re-presentation" rather than of "copying").

Plato and Aristotle spoke of *mimesis* as the re-presentation of nature. According to Plato, all

artistic creation is a form of imitation: that which

really exists (in the "world of ideas") is a type created

by God; the concrete things man perceives in his

existence are shadowy representations of this ideal

type.

What is the difference between art history and art ... Learning how to appreciate art is a necessary cultural foundation enabling people to critically analyze art, art forms, and how cultures used art. All it takes to understand the art is just to look! Art appreciation centers on the ability to view art throughout history, focusing on the cultures and the people, and how art developed in the specific periods.

1.1: What Is Art Appreciation? - Humanities Libertexts  
Art is often intended to appeal to, and connect with, human emotion. Key Terms. aesthetics: The branch of philosophy dealing with the nature of art, taste, and the creation and appreciation of beauty.  
intuitive: Spontaneous, without requiring conscious thought; easily understood or grasped by instinct.

The ancient Greeks developed their own very specific ethos of art appreciation, advocating a rational involvement with art. This book explores why the ancient Greeks started to write art history and how the writing of art history transformed the social functions of art in the Greek world. It looks at the invention of the genre of portraiture and the social uses to which portraits were put in the city state. Later chapters explore how artists sought to enhance their status by writing theoretical treatises and producing works of art intended for purely aesthetic contemplation, which ultimately gave rise to the writing of art history and to the development of art collecting. The study, which is illustrated throughout and draws on contemporary perspectives in the

sociology of art, will prompt the student of classical art to rethink fundamental assumptions about Greek art and its cultural and social implications.

All normal human beings alive in the last fifty thousand years appear to have possessed, in Mark Turner's phrase, "irrepressibly artful minds." Cognitively modern minds produced a staggering list of behavioral singularities--science, religion, mathematics, language, advanced tool use, decorative dress, dance, culture, art--that seems to indicate a mysterious and unexplained discontinuity between us and all other living things. This brute fact gives rise to some tantalizing questions: How did the artful mind emerge? What are the basic mental operations that make art possible for us now, and how do they operate? These are the questions that occupy the distinguished contributors to this volume, which emerged from a year-long Getty-funded research project hosted by the Center for Advanced Study in the Behavioral Sciences at Stanford. These scholars bring to bear a range of disciplinary and cross-disciplinary perspectives on the relationship between art (broadly conceived), the mind, and the brain. Together they hope to provide directions for a new field of research that can play a significant role in answering the great riddle of human singularity.

visual culture. Smart, clear and relevant examples challenge readers to question their visual environments and become critics and creators themselves' - "Sean Cubitt, University of Waikato " In a world increasingly preoccupied with the visual, it has become essential to understand the dynamics of images and be able to interpret them skilfully. The authors outline our relationship to the visual from ancient times to the cyber-present. Understanding the Visual shows the reader how to analyse the structure, conventions, contexts and uses of the visual in western cultures. Richly illustrated and crossing the fields of cultural studies, communication and media studies, film, art, design, and sociology the authors show how to make sense of visual objects of all kinds.

This study focuses on Aby Warburg, whose collection is housed in the University of London's Warburg Institute. The collection includes a translation of one of Warburg's Gombrich lectures and essays on Warburg's main pursuits.
