This book offers a diversification model of transplanted languages that facilitates the exploration of external factors and internal changes. The general context is the New World and the variety that unfolded in the Central Highlands and the

Gulf of Mexico, herein identified as Mexican Colonial Spanish (MCS). Linguistic corpora provide the evidence of (re)transmission, diffusion, metalinguistic awareness, and select focused variants. The tridimensional approach highlights language data from

authentic colonial documents which are connected to socio-historical reliefs at particular periods or junctions, which explain language variation and the dynamic outcome leading to change. From the Second Letter of Hernán Cortés (Seville 1522) to the decades

preceding Mexican
Independence
(1800-1821) this book
examines the variants
transplanted from
the peninsular tree
into Mesoamerican
lands: leveling of
sibilants of late
medieval Spanish,
direct object (masc.
sing.] pronouns LO
and LE, pronouns of
address (vos, tu,

Download Ebook Buen

vuestra merced? plus plurals), imperfect subjunctive endings in -SE and -RA), and Amerindian loans.

Qualitative and quantitative analyses of variants derived from the peninsular tree show a gradual process of attrition and recovery due to their saliency in the new soil, where they

were identified with ways of speaking and behaving like Spanish speakers from the metropolis. The variants analyzed in MCS may appear in other regions of the Spanish-speaking New World, where change may have proceeded at varying or similar rates.

Additional variants

viaj is classified as optimal residual (e.g. dizque) and popular residual (e.g. vide).

Both types are derived from the medieval peninsular tree, but the former are vital across regions and social strata while the latter may be restricted to isolated and / or marginal speech

communities. Each of the ten chapters probes into the pertinent variants of MCS and the stage of development by century. Qualitative and quantitative analyses reveal the trails followed by each select variant from the years of the Second Letter (1520-1522) of

Hernán Cortés to the
end of the colonial
period. The
tridimensional

offers explanations
that shed light on the

change and the

Spanish. Focused-
attrition variants
were selected
because in the
process of
transplantation,
speakers assigned

variety. The core chapters include narratives of both major historical events (e.g. the conquest of Mexico) and tales related to major language change and identity change (e.g. the socio-political and cultural struggles of Spanish speakers born in the New World). The core

chapters also describe the strategies used by prevailing Spanish speakers to gain new speakers among the indigenous and Afro-Hispanic populations such as the appropriation of public posts where the need arose to file documents in both Spanish and Nahuatl,

forced and free labor
in agriculture,
construction, and the
textile industry. The
examples of optimal
and popular residual
variants illustrate the
trends unfolded
during three
centuries of colonial
life. Many of them
have passed the test
of time and have
survived in the

present Mexican territory; others are also vital in the U.S. Southwestern states that once belonged to Mexico. The reader may also identify those that are used beyond the area of Mexican influence. Residual variants of New World Spanish not only corroborate the homogeneity of
