Few inventions have had the impact of this ingenious, elegant, and deceptively simple device.

Camera: A History of Photography from Daguerreotype to ...

The history of the camera begins even before the introduction of photography. Cameras evolved from the camera obscura through many generations of photographic technology – daguerreotypes , calotypes , dry plates , film – to the modern day with digital cameras and camera phones .

History of the camera - Wikipedia

The History of Photography in the Modern Era: The Development of the Digital Camera. The introduction of the digital camera in 1994 changed the trajectory of the history of photography. The digital camera would come to dominate the market and make previous cameras nearly obsolete to the general public.

A History of Photography And How It Shaped The World ...

History of Photography. The history of photography timeline is a history of art and science together. Many photography timelines start with the first known photograph by Nicéphore Niépce in 1827. But it actually goes much further back than that. It goes back to a time and technology before lenses, cameras, and even film. Camera Obscura: 500 BCE - 1600 CE

History of Photography Timeline From Start to Present Day

This understanding of photography ' s supposed objectivity has dominated evaluations of its role in the arts. In the early part of its history, photography was sometimes belittled as a mechanical art because of its dependence on technology. In truth, however, photography is not the automatic process that is implied by the use of a camera.

history of photography | Inventions & Events | Britannica

It is believed that Camera Obscura was invented around 13-14th centuries, however there is a manuscript by an Arabian scholar Hassan ibn Hassan dated 10th century that describes the principles on
