"This book offers balanced coverage of the technological solutions that contribute to the design of digital textbooks and contribute to achieving learning objectives, offering an emphasis on assessment mechanisms and learning theory"--

Over the past thirty years, student assessment has become an increasingly important component of public education. A variety of methodologies in testing have been developed to obtain and interpret the wealth of assessment outcomes. As assessment goals are getting

increasingly multifaceted, new testing methodologies are called for to provide more accessible and reliable information on more complex constructs or processes, such as students' critical thinking and problem-solving skills. Testing methodologies are needed to extract information from assessments on such complicated skills, in order to advise teachers about certain areas of students that need intervention. It is even a bigger challenge, and a vital mission of today's large-scale assessments, to gain such information from testing data in an efficient manner.

For example PARCC and Smarter Balanced Assessments consortia are both striving to offer formative assessments through individualized, tailored testing. The book provides state-of-the-art coverage on new methodologies to support traditional summative assessment, and more importantly, for emerging formative assessments.

The Politics of Corruption in Dictatorships studies how institutional and social factors influence corruption in dictatorships. Dictatorships are often

synonymous with high levels of corruption, yet Vineeta Yadav and Bumba Mukherjee argue otherwise. The authors ask why corruption has declined in some but not other authoritarian regimes. What are the main political factors that drive some autocrats to curb corruption? The book explores the role that business mobilization can play in reducing corruption under some conditions in dictatorships. It investigates how political competition for an elected legislature affects the incentives of dictators to engage in corruption. The study relies on case studies

Adverse impact analyses and test validation promote social justice and equity. Employers who unknowingly use invalid tests or recruitment procedures that have an adverse impact are reducing minority and/or female representation in their workforce, unfairly screening out qualified workers and (worst of all) just plain discriminating. Dan Biddle's Adverse Impact and Test Validation provides

you with analyses that allow you to identify which of your selection procedures have adverse impact. The validation steps will help you decide whether to keep the selection procedure (because it's valid), change it, or stop using it altogether. Adverse Impact and Test Validation is a 'must-have' purchase for human resource professionals, testing and recruitment specialists.

United States economic sanctions against North Korea began on June 28, 1950, three days after the outbreak of the Korean War. Since then, the United States, its allies, and the United Nations have increasingly imposed economic sanctions against North Korea in an attempt to destabilize and manipulate the North Korean regime. This book first provides a thorough historical overview of U.S. and U.N. sanctions

against North Korea since 1950. Then, several essays propose ways to make such sanctions more politically effective while limiting their harmful humanitarian consequences. Finally, the book discusses the impact of the newest, six-nation agreement signed in February 2007 which would shut down North Korea's nuclear facility in return for economic aid and a security guarantee. Several appendices provide brief guides to the history of North Korea and the country's nuclear weapons program.
