This book examines the power transition between the US and China, and the implications for Europe and Asia in a new era of uncertainty. The volume addresses the impact that the rise of China has on the United States, Europe, transatlantic relations, and East Asia. China is seeking to use its enhanced power position to promote new ambitions; the United States is adjusting to a new superpower rivalry; and the power shift from the West to the East is

resulting in a more peripheral role for Europe in world affairs. Featuring essays by prominent Chinese and international experts, the book examines the US–China rivalry, the changing international system, grand strategies and geopolitics, foreign policy, geo-economics and institutions, and military and technological developments. The chapters examine how strategic, security, and military considerations in this triangular relationship are gradually undermining trade and economics, reversing the era of globalization, and contributing to the breakdown of the US-led liberal order and institutions that will be difficult to rebuild. The volume also examines whether the adversarial antagonism in US–China relations, the tension in transatlantic ties, and the increasing rivalry in Europe–China relations are primarily resulting from leaders’ ambitions or structural power shifts. This book will be of much interest to students of Asian security, US foreign policy, European politics, and International Relations in general.

This new Major Work is fully indexed and includes a comprehensive index, newly written by the editor, which places the collected material in its historical and intellectual context. It is destined to be valued by scholars, students and researchers.

As the world's most dynamic region, Asia embodies explosive economic growth, diverse political systems, vibrant societies, modernizing militaries, cutting-edge technologies, rich cultural traditions amid globalization, and strategic competition among major powers. As a result, international relations in Asia are evolving rapidly. In this fully updated and expanded volume, leading scholars from Asia, Europe, and North America offer the most current and definitive analysis available of Asia's regional relationships. They set developments in Asia in theoretical context, assess the role of leading external and regional powers, and consider the importance of subregional actors and linkages. Combining interpretive richness and factual depth, their essays provide an authoritative and stimulating overview. Students of contemporary Asian affairs—new to the field and old hands alike—will find this book an invaluable read. Contributions by: Amitav Acharya, Sebastian Bersick, Nayan Chanda, Ralph A. Cossa, Michael Green, Samuel S. Kim, Edward J. Lincoln, Martha Brill Olcott, T.V. Paul, Phillip C. Saunders, David Shambaugh, Sheldon W. Simon, Scott Snyder, Robert Sutter, Hugh White, and Michael Yahuda

Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America, Africa and Polynesia. The second part discusses the ways in which these international systems were brought into contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization – and their consequences on contemporary society. History of International Relations provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.

Japan's Foreign Relations in Asia has been specifically designed to introduce students to Japan’s foreign relations in Asia since 1990, a period in which there have been dramatic developments in Japan, including the reinterpretation of the Constitution and expanded US–Japan defence cooperation. The geopolitical dynamics and implications of these new developments are profound and underscore the need for a new textbook on this subject. Covering not only the key regional players of China and the Koreas, this textbook also encompasses chapters on Japan’s relations with India, Myanmar, Indonesia,

Vietnam, the Philippines and Thailand, along with its multilateral engagement and initiatives. Combined with transnational chapters on critical issues, key themes covered by this book include: An historical overview of key post-war developments. Japan's evolving security policy. Analysis of the region's escalating maritime disputes. An evaluation of Japanese soft power in Asia. Written by leading experts in accessible, jargon-free style, this new textbook will appeal to undergraduate and postgraduate students of Japanese politics, international relations and foreign policy and Asian affairs in general.

Written by a team of leading scholars, this volume presents a variety of theoretical perspectives and case studies to offer a comprehensive analysis of the pressures that shape the policy choices of China, Russia, Japan, the United States, North and South Korea, and Taiwan.

As China takes up the mantle of a global power, its diplomatic policy has changed significantly as it assumes a role of regional leadership. Until recently, China has not tended to talk about its developmental strategy as a model for others to follow. Since the rise of Xi Jinping this has changed, and the state has become more open in sharing its developmental experiences with its neighbours. This has become an important part of China's diplomatic relations with other countries in East Asia. Beijing has also emphasized people-to-people diplomacy, with outward tourism and other exchanges of peoples seen as an important part of building stronger relations with its neighbours. The chapters in this book all address different elements of this strategy, looking at China's bilateral relationships with other East Asian countries in terms of developmental relations and the increasing mutual exposure of their citizens. This book will be of great interest to scholars of Chinese diplomacy, especially those with a particular interest in soft power.

These essays support the argument that strong and effective presidential leadership is the most important prerequisite for South Korea to sustain and project its influence abroad. That leadership should be attentive to the need for public consensus and should operate within established legislative mechanisms that ensure public accountability. The underlying structures sustaining South Korea's foreign policy formation are generally sound; the bigger challenge is to manage domestic politics in ways that promote public confidence about the direction and accountability of presidential leadership in foreign policy.

Asia is a complex and diverse continent, which has seen the scope and pace of transformation increase rapidly over the past 30 years. In turn, the economic growth and social change seen in the region, combined with new global security profiles and environmental challenges, have contributed to placing Asia at the forefront of international affairs. This Handbook brings together leading scholars of different disciplines, including Politics and International Relations, Security Studies and Law, to provide a comprehensive analysis of both the prospects and problems which have emerged from Asia's rise. Examining how developments across the continent have influenced global politics and how the region has responded to the international community in the modern era, the sections cover: Major actors in Asian politics, especially China, Japan and India, International relations in Asia and intra-Asian tensions Special issues of world politics in Asia including modern conflicts in and attitudes towards the Middle East The Routledge Handbook of Asia in World Politics will be useful to students and scholars of Global Politics, International Relations and Asian Studies.

How does China see the rest of the world? One way to answer this question is to look at the work of China's scholars in the field of International Relations (IR). This leads to a second question – to what extent do Chinese IR scholars influence Beijing's foreign policy and outlook? The contributors to this book seek to answer these key questions, drawing on their own first- and second-hand experiences of involvement in scholarly IR debates in China. Discussing fundamental aspects of China's foreign policy such as China's view of the international structure, soft power projection, maritime disputes, and the

principle of non-interference, this book provides insights into the hinterland of Chinese foreign policy-making. It is an invaluable reference for global IR scholars, especially those with a direct interest in understanding and predicting China's actions and reactions on a range of international issues.
