learning and development roles looking to develop their understanding of the latest developments facing the profession. With a particular focus on digital, blended and social learning it will help you deliver more for less. Starting with an introduction to learning and development, it shows how to make the business case for activities, use metrics to demonstrate the value add, and engage the right stakeholders. Drawing on the latest research, Professional Practice in Learning and Development highlights the new opportunities made available to the learning and development practitioner by technology, new media and the networked world in which we live. It looks at approaches to helping people learn and how to develop tailored solutions. Case studies and reflective questions develop skills in facilitating collaborative learning, working in teams, and communicating effectively with all stakeholders. This book also equips you to measure and communicate the value of the programmes and, drawing on insights from neuroscience, demonstrates some practical new tools for engaging learners to improve the effectiveness of their work.

Occupational Therapy and Life Course Development is an invaluable work book for professional practice. It provides a tool to help both students and qualified professionals develop and enhance a framework for their practice that supports all individuals and settings in a holistic and inclusive way. Much of the book is organised as a work book based around a single case study. It includes theory related to life span development and managing change, and also exercises for readers to complete in order to apply the theory to practice. Chapters span such key topics as the client in context; life events; transition and loss; the management of stress; and planful decision making. The book emphasises how issues of life course development are as relevant to health and social care professionals as they are to their clients. A number of exercises invite readers to reflect on their own life course, and there chapters both on becoming and belonging as an occupational therapist, and on developing professional practice.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well.

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships

with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Developing Professional Practice in the Early Years encourages the reader to critically consider key aspects of early childhood education and care. The book is a valuable and accessible tool for those on professional pathways to Qualified Teacher Status (QTS) or Early Years Teacher Status (EYTS) or those engaged in Early Childhood Studies programmes or similar degree programmes courses relating to early years practice. This book will also be of interest to those engaged in continuous professional development (CPD) programmes. The book recognises the important contribution that early years education and care can make to children's future outcomes. It can be read in-depth or dipped into when need arises. Each chapter will help the reader to engage with challenging concepts and ideas which underpin early childhood policy and practice. Strong practical elements to the book aim to support the application of learning to high quality practice with young children. The generic term 'early childhood professional' is used throughout the book to encompass the diversity of roles within early childhood practice. The book aims to support the reader to critically consider the complexity of 'being professional' in contemporary early childhood practice by providing a strong theoretical and practice-based framework of the role and context of the early childhood professional. Key features of the book include:

- Reflective tasks to support critical thinking about key aspects of professional practice
- Case studies to enable the reader to learn from stories and situations about real professionals and their practice
- Positive Practice Impact (PPI) boxes to provide specific examples of good professional practice in early childhood.

Each chapter of this essential text concludes by signposting further reading – book chapters, journal articles, websites – to build greater depth of knowledge and extend the reader's understanding of early childhood theory and practice.

Developing Professional Practice 0-7 provides a thoroughly comprehensive and cutting edge guide to developing the understanding and practical skills necessary for working within early years education. The new edition is fully updated for the revised Early Years Foundation Stage Statutory Framework. The updated edition covers all core topics associated with developing effective professional practice, including leadership and management, personalised learning and continuing professional development. There is also a strong focus on parent/carer engagement, setting accountability for the lowest attaining groups, the parent/carer and child voice in education, transition, SEND reform, early intervention, and developing leadership at all levels including as a business model. Readers can explore in-depth issues, and take ownership of them, by applying theory to real practice in schools and early years settings. Chapter contents are directly linked to the Early Years Teacher Standards, providing a clear understanding of how the content relates to competencies and allowing readers to reflect critically on best practice. Discussion points and case studies further connect theory to practice and offer a genuinely accessible and engaging introduction to supporting the education of babies, toddlers and young children. This vibrant, dynamic and interactive approach uses examples of real practice, along with a range of additional features tailored to support the reader in developing their knowledge, skills and understanding. Developing Professional Practice 0-7 is essential reading for anyone training to work in the early years, and an invaluable resource for all those already in the early stages of their careers.
