Eaton Transmission Service Manuals | e Pro Gear

Manual Mode"M"should be used whenever you want to control the shifts, such as moving around the yard, going up a grade, or in poor traction situations. Low Mode "L"should be used anytime you want to maximize the engine brake such as going down a long grade, or when coming to a stop.

Fault Code Retrieval/Clearing Automated Transmissions

The AutoShift transmission, based on the RT Series manual transmission, is an advanced shift-by-wire system that communicates with the engine utilizing the SAE-J1939 protocol for precise control of the engine and transmission functions. Using a three pedal system, the Solo self-adjusting clutch is used only for starting and stopping.

SmartShift Control Testing for Eaton AutoShift The AutoShift DataLink Monitor template (see Fig. 8) will display the current vehicle status and will reflect change in status. Vehicle information is retrieved from the transmission ECU on the datalink. The monitor can also be used to verify readings on the instrument panel.

Troubleshooting

MANUAL mode should be used whenever the driver wants to select the shifts instead of letting UltraShift select them automatically. For example, when the driver is moving around the yard, over railroad tracks, or on steep grades. † Driver manually selects the start gear and uses the up/down buttons to shift (see Note *).

SmartShift™ is the latest development in shift-by-wire technology. It allows the driver to concentrate more on the road and less on the hassle of shifting, by eliminating the need to use the clutch between gears during normal driving. Used in conjunction with Eaton's automated transmissions, the SmartShift™ system is the way of the future.
