STREETNOISE commutes, gestures, traffic and dustinety images 1975 -19 76Turkey, Afghanistan, India, Sri Lanka, Burma (now Myanmar) Besides the invasion, the camera intruding beyond the gaze, its paths elude to impressions of many kinds. A shoreline becomes an existential trail redolent with a lambent aesthetic. A recumbent cow draws the sacred down into the secular and much becomes transparent.Any project that sets out to redefine images taken over forty years ago offers a reprieve from the vivid, ultra-sharp, super-colour and dramatic weight that characterize contemporary output. Ten months of solitary, low-cost travel from Turkey to Burma - and particularly the metropolitan (then) Calcutta, (now) Kolkata - returns one's gaze in an embrace that shocks, even brutalizes the senses, but which yet evokes a fundamental awareness of affinity.These images were taken with a Nikon F2 camera with a 20mm, 35mm and a Micro 55mm Nikkor manual focus lens.Film used were 35mm Kodak black & white 36 exposures Tri-X and Plus-X film. Developed in Kodak HC-110 Developer.Negatives were scanned with an Epson Perfection 3170 Photo scanner.Twenty-four of these ninety images were printed and exhibited in analogue print form at The Photographers' Gallery, Melbourne, Australia in 1976. One of a series of three resource guides concerned with communication, control, and computer access for the disabled or the elderly, the book focuses on hardware and software. The guide's 13 chapters each cover products with the same primary function. Cross reference indexes allow access to listings of products by function, input/output feature,and computer model. Switches are listed separately by input/output features. Typically provided for each product are usually an illustration, the product name, vendor, size, weight, power source, connector type, cost, and a description. Part I, "Computer Adaptations," presents the following types of items: modifications for standard keyboards; alternate inputs usable with all software; input devices usable with only some software; input adapters for computers; alternate display systems usable with all software; Braille printers and tactile display components; speech synthesizers; and other software and hardware adaptations. Part II, "Application Software for Special Ed and Rehab," includes software for administration and management; assessment; education, training, and therapy; recreation; and personal tools or aids. Appendixes include a list of additional sources of information, a glossary, addresses of manufacturers listed with their products, and an alphabetical listing of all products in the 3-book series.
