Financial Accounting For Decision Makers by Peter Atrill

Financial & Managerial Accounting for Decision Makers is intended for use in an introductory accounting course that combines financial and managerial accounting concepts, at either the undergraduate or graduate level; one that balances the preparation of accounting information with its analysis and interpretation.

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.

FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS, 10E makes it easy to demonstrate that accounting is a powerful tool for business decision-making by going beyond debits and credits and keeping students focused on the big picture. For example, journal entries require students to demonstrate the balance sheet and income statement impact of transactions, helping students see how business events ultimately impact the financial statements. In addition to exposing students to annual reports of highly recognizable companies such as Nike, Porter's exclusive Ratio Decision-Model provides students with a framework for reading and interpreting financial statements to make decisions. The focus on financial statements and decision-making carries through to the end-of-chapter with a suite of case materials that have students reading and interpreting financial statements. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

With a comprehensive and accessible introduction to the subject, Financial Accounting for Decision Makers focuses on the ways in which financial statements and information can be used to improve the quality of decision making. The practical emphasis throughout the book ensures the material is always relevant, whilst the authors' style of introducing topics gradually and explaining technical terminology in a clear, friendly style caters for all students, whether on specialist accounting or non-specialist business degrees.

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.

Adopting an innovative, open-learning approach to introduce the main principles of financial management in an accessible, non-technical way, this fully updated fifth edition provides a unique focus on the practical application of financial management and its role in decision making.New to this edition: Expanded coverage of key topics such as financing the business Increased coverage of corporate governance issues Even more real-world examples to help illustrate the practical application and importance of the topics discussed Financial statements throughout based on the latest International Accounting Standards Full-colour design, packed with pedagogical features, providing an original learning experience Key features: Written in a unique, ' open learning' style Clear explanations and minimal technical jargon to aid understanding -no previous knowledge of financial management is assumed Based on a solid foundation of theory, but focusing throughout on its value for decision making Covering all the main areas of financial management in sufficient detail to provide a good grasp of the subject Numerous examples, activities and exercises throughout, allowing the reader to test his/her knowledge at frequent intervalsFully supported by a comprehensive range of student and lecturer learning resources, Financial Management for Decision Makers is ideal for undergraduates from a non-finance/accounting discipline taking an introductory module in financial management, and postgraduate/postexperience students on courses such as the ACCA Diploma in Financial Management, Diploma in Management Studies and MBA programmes. The text is also suitable for finance and accounting students as a foundation for further study.Peter Atrillis a freelance academic and author working with leading institutions in the UK, Europe and SE Asia. He has previously held posts as Head of Business and Management and Head of Accounting and Law at University of Plymouth Business School.

This text is an introductory course in management accounting for those seeking an understanding of basic principles and underlying concepts without detailed technical knowledge. It has a strong practical emphasis, with plenty of examples taken from the real world as well as numerical examples with step-by-step explanations.
