This is a most enlightening book written in a most accessible style, with periodic in-depth treatment of theoretical propositions, using diagrams. Students studying a variety of economics and business related courses could find this book invaluable. David Gray, International Journal of Entrepreneurship and Innovation One of the most exciting developments in economics in recent decades has been the emergence of a coherent framework for understanding why organisations have different structures and attributes. There is no better way of learning about this fascinating literature on incomplete information and transaction costs than Martin Ricketts's accessible and authoritative book. Very highly recommended. J.H. Pencavel, Stanford University, US Martin Ricketts has succeeded in updating his book with the addition of a completely new section on the burning issue of privatisation policy in East and West, along with a very readable exposition of the new micro-foundation of property rights theory. It is a brilliantly lucid introduction into modern institutional economics, exemplified by the theory of the firm the best book of its kind on the market. Rudolf Richter, University of Saarland, Germany To own or not to own? To make or to buy? To franchise or to manage? To contract long or to contract short? To trust or not to trust? To license or not to license? These and other questions are the subject matter of this excellent introduction to the theory of economic organisation. This fully updated edition of Martin Ricketts's 1987 book includes: New developments in the property rights theory of the firm Further extended treatment of co-operative and mutual forms of enterprise Entirely new sections on transactions cost economics and public policy New chapters on the economics of privatisation and the regulation of natural monopoly. In addition, transaction cost, property rights and agency approaches are contrasted, and Austrian and evolutionary criticisms of standard theory are explored. The author applies these theories to a wide range of questions from the choice of piece rates or time rates in contracting to the debate on Anglo-American versus other varieties of capitalism. Public policy in the fields of regulation and privatisation is also considered using the same framework. Non-specialists will find this book to be an accessible introduction to the main theoretical approaches to economic organisation. Students and researchers specialising in the fields of economics and business will find that this third, updated edition of The Economics of Business Enterprise continues to provide stimulating insights suggestive of further research.

The ninth edition of this guide continues the tradition of giving its readers independent assessments of MBA programmes and business schools worldwide. The text offers advice and guidance to individuals and organizations, helping them to assess the MBA opportunities available to them. Featuring comments on the individual schools and their programmes, information on fees, costs, entry requirements, application details and student profiles. Includes part time, full time and distance learning courses. The book is divided into separate sections for the UK, Europe, USA and the rest of the world.

"Advances in Raw Material Industries for Sustainable Development Goals" presents the results of joint scientific research conducted in the context of the Russian-German Raw Materials Forum. Today Russia and Germany are exploring various forms of cooperation in the field of mining, geology, mineralogy, mechanical engineering and energy. Russia and Germany are equally interested in expanding cooperation and modernizing the economy in terms of sustainable development. The main theme of this article collection is connected with existing business ventures and ideas from both Russia and Germany. In this book the authors regard complex processes in mining industry from various points of view, including: - modern technologies in prospecting, exploration and development of mineral resources - progressive methods of natural and industrial mineral raw materials processing - energy technologies and digital technologies for sustainable development - cutting-edge technologies and innovations in the oil and gas industry. Working with young researchers, supporting their individual professional development and creating conditions for their mobility and scientific cooperation are essential parts of Russian-German Raw Materials Forum founded in Dresden 13 years ago. This collection represents both willingness of young researchers to be involved in large-scale international projects like Russian-German Raw Material Forum and the results of their long and thorough work in the promising areas of cooperation between Russia and Germany.

This original contribution to business ethics brings together chapters by leading European and Indian scholars and practitioners. Addressing issues of human values, ethics, spirituality and leadership in business the authors aim to create a dialogue and interchange between Indian and European cultural traditions. Topics include spiritual orientations to business in Hindu, Buddhist and Christian traditions; the effect of spirituality upon contemporary leadership theories; sustainable business models in India and Europe and a comparison between Indian and European philosophies of leadership. In exploring what India and Europe can offer to one another in the development of ethical business leadership, Ethical Leadership aims to demonstrate ways to achieve sustainability, peace and well-being.
