ISBP 745 has some crucial elements with regards to air waybills. To start, a carrier should not only use their IATA code. This means airlines such as Singapore Airlines and British Airways need more than SQ and BA respectively. With this in mind, airports such as Los Angeles and London Heathrow can use LAX and LHR

International Standard Banking Practice (ISBP) for the examination of documents under documentary credits, answers the most relevant questions practitioners have concerning how UCP 500, ICC's universally used rules on documentary credits, are to be integrated into day-to-day practice. The product of more than two years of work by the ICC Banking Commission, ISBP is based on the official Opinions issued by the Banking Commission in response to queries submitted by users of UCP 500. The text provides responses to the key questions relating to the examination of drafts, multimodal transport documents, insurance documents, certificates of origin and a range of other documents associates with letters of credit. This publication reflects international standard banking practice for all parties to a documentary credit. Figures show that 60%-70% of credits are rejected for discrepancies on first presentation. The new ISBP, by encouraging a uniformity of practice worldwide, is expected to cut these figures dramatically and, by doing so, to facilitate the flow of world trade.

This book explains 34 key documentary credit concepts in a clear and simple manner. But not only that; also taking it out of its context – so that one can

approach one concept when it is appropriate. The idea is to describe each of these concepts as short as possible (and present them in alphabetic order) – and primarily from the perspective of the documentary credit.

If you think that the rules of the International Chamber of Commerce (ICC), Paris on trade finance and documentary credits have no surprises left for you, then read this book very carefully from cover to cover. Whether you are a trade finance veteran or a recent entrant, the articles in this book will provide you with a few unconventional and unusual perspectives about the UCP and the ISBP rules. The book discusses selected provisions of UCP 600, and also raises several pertinent questions. For example, does the SWIFT MT700 really provide for an expiry date? Is article 15 necessary? Why shouldn't UCP sub-article 16(f) apply to a nominated bank? Did you know that UCP article 10 on amendments has a huge logical error? Why are some critical rules missing in the UCP (they are only in the ISBP)? Are you aware that sub-articles 14(g), and 14(h) on non-documentary conditions, are both incorrectly structured? Which ICC 'rules' apply if a presentation contains only copies of transport documents? Must a B/L or a MMTD show a date of issue? What is 'negotiation'? Why is the place where a credit is available of critical importance to an exporter/beneficiary? Go ahead and read the book. It will provide you with plenty of food for thought, a deeper understanding of the rules of trade finance, and value for money.

Trade Finance provides a much-needed re-examination of the relevant legal principles and a study of the challenges posed to current legal structures by technological changes, financial innovation, and international regulation. Arising out of the papers presented at the symposium, Trade Finance for the 21st Century, this collection brings together the perspectives of scholars and practitioners from around the globe focusing on core themes, such as reform and the future role of the UCP, the impact of technology on letters of credit and other forms of trade finance, and the rise of alternative forms of financing. The book covers three key fields of trade finance, starting with the challenges to traditional trade financing by means of documentary credit. These include issues related to contractual enforceability, the use of "soft clauses", the doctrine of strict compliance, the fraud exception, the role of the correspondent bank, performance bonds, and conflict of laws problems. The second main area covered by the work is the technological issues and opportunities in trade finance, including electronic bills of exchange, blockchain, and electronically transferable records. The final part of the work considers alternative and complementary trade finance mechanisms such as open account trading, supply-chain financing, the bank payment obligation, performance bonds, and countertrade.

selecting the right terms of payment, improving operations, reducing errors and risks, facilitating trade and final settlement, and much more. It is extensively researched, delving deep into the subject of international trade, presenting current issues and solutions related to LCs that the reader may not otherwise come across easily. A gold mine of information on payment risk management, it's the last word on documentary credits. "This book is a great read for knowledge and practical information on letters of credit. It succinctly takes the reader through the concepts of risk management, explains the fundamentals of global trade finance issues, the dilemmas plaguing international sellers and buyers, and standardised ways for the buyer and the seller to secure goods and make payments, respectively. This is a must-read book for academicians, exporters, importers and bankers looking for complete, authentic information on international trade finance and global business." - Dr. Deepankar Sinha, Professor; Head - Research Division, Kolkata Campus; Programme Director - Centre for Trade and Logistics (CFTL), Kolkata Campus, Indian Institute of Foreign Trade (IIFT)
