On Oct. 22, the Eurocompliance certification body announced to Systra's management that it had obtained ISO 37001 certification following an audit of its anti-bribery management system carried out ...

When is a gift not a gift? When it's a bribe. For many, corporate hospitality oils the wheels of commerce. But where do you draw the line? Bribes, incentives and inducements are not just a matter of used banknotes stuffed in brown envelopes. Expenses, corporate settlement of personal bills, gifts and hospitality can all be used to influence business partners, clients and contractors. Can you afford unlimited fines? Under the Bribery Act 2010, a maximum of ten years' imprisonment and an unlimited fine may be imposed for offering, promising, giving, requesting, agreeing, receiving or accepting bribes. With such strict penalties, it's astonishing that so few companies have few or no measures in place to ensure that they are not liable for prosecution. The Ministry of Justice's quick start guide to the Bribery Act makes it clear that "There is a full defence if you can show you had adequate procedures in place to prevent bribery". Such procedures can be found in ISO 37001, the international standard for ABMSs. How to implement an ABMS ISO 37001: An Introduction to Anti-Bribery Management Systems explains how to implement an ABMS that meets the requirements of ISO 37001, from the initial gap analysis to due diligence management, and covers the following: An introduction to ISO 37001. An ABMS explained. Management processes within an ABMS. Implementing an ABMS. Risk assessment in due diligence. Whistleblowing and bribery investigations. Internal auditing and corrective action. Certification to ISO 37001. The book provides helpful guidance on the importance of clearly defining policies; logging gifts and hospitality in auditable records; ensuring a consistent approach across the organisation; controls for contractors; facilitation payments; and charitable and political donations. Meet the stringent requirements of the Bribery Act Not only will an ISO 37001-compliant ABMS help your organisation prove its probity by meeting the stringent requirements of the Bribery Act but it can also be adapted to most legal or compliance systems. An ethical approach to business is not just a legal obligation but a way to protect your reputation.

Will ISO 37001 impose an unnecessarily heavy bureaucracy on your organization? What are the potential consequences if your organization gets involved in bribery? Does stakeholder orientation matter? Does this create a paper-based, check-the-box program? How will the Standard benefit your organization? Michael Volkov's career has spanned 30 years as an attorney in Washington, D.C. - as a federal prosecutor, a Chief Counsel on the Senate and House Judiciary Committees, a trial attorney in the Antitrust Division and in private practice. This book will help anyone better understand anti-bribery compliance in the U.S. and beyond. "Michael Volkov's book is a compilation of articles on a number of subjects important to lawyers advising clients how to stay out of trouble. He is a prolific writer and I can say without question, we have not heard the last of his musings. Simply put, his book contains important information that should prove helpful to lawyers, particularly to those who practice in the white collar field." - Judge Stanley Sporkin, Former Director of the Division of Enforcement, U.S. Securities and Exchange Commission.

The GCBME Book Series aims to promote the quality and methodical reach of the Global Conference on Business Management & Entrepreneurship, which is intended as a high-quality scientific contribution to the science of business management and entrepreneurship. The Contributions are expected to be the main reference articles on the topic of each book and have been subject to a strict peer review process conducted by experts in the fields. The conference provided opportunities for the delegates to exchange new ideas and implementation of experiences, to establish business or research connections and to find Global Partners for future collaboration. The conference and resulting volume in the book series is expected to be held and appear annually. The year 2019 theme of book and conference is "Transforming Sustainable Business In The Era Of Society 5.0". The ultimate goal of GCBME is to provide a medium forum for educators, researchers, scholars, managers, graduate students and professional business persons from the diverse cultural backgrounds, to present and discuss their research, knowledge and innovation within the fields of business, management and entrepreneurship. The GCBME conferences cover major thematic groups, yet opens to other relevant topics: Organizational Behavior, Innovation, Marketing Management, Financial Management and Accounting, Strategic Management, Entrepreneurship and Green Business.

The last twenty years have witnessed an astonishing transformation: the fight against corruption has grown from a handful of local undertakings into a truly global effort. Law occupies a central role in that effort and this timely book assesses the challenges faced in using law as it too morphs from a handful of local rules into a global regime. The book presents the perspectives of a global array of scholars, of policy makers, and of practitioners. Topics range from critical theoretical understandings of the global regime as a whole, to regional and local experiences in implementing and influencing the regime,

including specific legal techniques such as deferred prosecution agreements, addressing corruption issues in dispute resolution, whistleblower protection, civil and administrative prosecutions, as well as blocking statutes. The book also includes discussions of the future shape of the global regime, the emergence of transnational compliance standards, and discussions by leaders of international organizations that take a leading role in the transnationalization of anti-corruption law. The Transnationalization of Anti-Corruption Law deals with the most salient aspects of the global anti-corruption regime. It is written by people who contribute to the structure of the regime, who practice within the regime, and who study the regime. It is written for anyone interested in corruption or corruption control in general, anyone with a general interest in jurisprudence or in international law, and especially anyone who is interested in critical thinking and analysis of how law can control corruption in a global context.

This book guides readers through the broad field of generic and industry-specific management system standards, as well as through the arsenal of tools that are needed to effectively implement them. It covers a wide spectrum, from the classic standard ISO 9001 for quality management to standards for environmental safety, information security, energy efficiency, business continuity, laboratory management, etc. A dedicated chapter addresses international management standards for compliance, anti-bribery and social responsibility management. In turn, a major portion of the book focuses on relevant tools that students and practitioners need to be familiar with: 8D reports, acceptance sampling, failure tree analysis, FMEA, control charts, correlation analysis, designing experiments, estimating parameters and confidence intervals, event tree analysis, HAZOP, Ishikawa diagrams, Monte Carlo simulation, regression analysis, reliability theory, data sampling and surveys, testing hypotheses, and much more. An overview of the necessary mathematical concepts is also provided to help readers understand the technicalities of the tools discussed. A down-to-earth yet thorough approach is employed throughout the book to help practitioners and management students alike easily grasp the various topics.

This book is an in-depth study of how to promote integrity and avoid fraud & corruption in the work of international organisations, in particular multilateral development banks, such as the European Investment Bank, World Bank, Asian/Inter-American/African Development Banks and European Bank for Reconstruction and Development. A number of issues are reviewed, including procurement, compliance, corporate governance, business ethics, anti money laundering and a number of relevant case studies highlighted. In addition, effective methods and tools of prevention, proactive monitoring and detection are reviewed and, if misconduct is identified, sanctioning the perpetrators of such misconduct is discussed.
