Steps of the Scientific Method 1. Ask a Question. The scientific method starts when you ask a question about something that you observe: How, What,... 2. Do Background Research. Rather than starting from scratch in putting together a plan for answering your question, you... 3. Construct a ...

Steps of the Scientific Method—Science-Fair-Project—

Scientific Steps. Presentation. Investigation. The key to a good and manageable investigation is to choose a topic of interest, then ask what is called a “testable question.”. Testable questions are those that can be answered through hands-on investigation by the student. The key difference between a general interest science question and a testable question is that testable questions are always about changing one thing to see what the effect is on another thing.
