Perception. This is a book about how we see: the environment around us (its surfaces, their layout, and their colors and textures); where we are in the environment; whether or not we are moving and, if we are, where we are going; what things are good for; how to do things (to thread a needle or drive an automobile); or why things look as they do.

The Ecological Approach To Visual Perception

In vision, this emphasis on the interdependence between a real agent and its environment is often referred to as the Ecological Approach to Visual Perception, as coined by JJ Gibson in his 1977 book with the same title. The goal of this course is to concretely explore this general perspective of an agent in its environment.
